The Phillips No. 1 is doing eighty barrels per hour and shows no signs of decreasing.

-A live tortoise was found in a solid cake of ice at Cornwall, Orange County N. Y., recently. It measures eigh inches in length and five in width, and was carefully cut out and taken to Mr. Clark's home, where, after it had lain in the sun for a few hours, it began to show signs of life. It is now looked upon as a great curiosity, as the ice was gathered last winter, and the turtle is apparently none the worse for its ten months' confinement in its congested abiding-place. - N. J.
